EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims

In claim 10: line 2, "layer" has been deleted. This deletion was suggested in the previous Office action.

Fully amended text is given below:

10. (Currently Amended) The method of claim 1, further comprising polishing the lens material layer.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Best reference noted is Nishikawa et al. Despite its striking similarity with the present invention, the lens array device of the patent has partitions separating adjacent lenses while the present device has the lens material layer entirely over the dielectric layer. Further, in the broadest independent claim 27 of the present case, the lens material layer has a polished upper surface. This latter characteristic is not intended by the

patent in consideration. Therefore, in light of the above indicated difference, it is concluded that the present invention distinguishes over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
